Project Manager

Job description

- To head up individual projects from order receipt to post commissioning
- Reports to Chief Executive
- Must have experience in design risk assessment and be able to read drawings
- Ideal experience will include process equipment and conveyor systems.
- Will need to be accurate and methodical with the drive, energy and commitment to complete projects within a definable timescale.
- Strong communication commitment, problem solving skills and the ability to work under pressure are key.
- Experience with MS Project is ideal and the general MS office suite is essential.
- Proven related experience is essential, ideally gained within automotive industry, aerospace or related industries.
- Flexibility is needed with regard to travel since projects are around both the UK and some overseas.

Qualifications

- Ideally to HNC or equivalent but mostly experience is what is needed
- Experience with PLC control systems would be ideal.
- Good work ethics and the will to advance are pre-requisites.
